

How to secure GrowCover at the end of a frame

*Step 1.
Securing the ends of a GrowHouse
To close the end of a GrowHouse push a garden stake
into the ground in the middle of the end of the garden bed*

*2. Pull the GrowCover from the right hand side across the
end and clip the GrowCover to the garden stake at the
bottom and top*

*3. Pull the GrowCover from the left hand side and attach it
to the garden stake at the top and bottom. The clip should
secure two layers of GrowCover now so you can remove the
original clips used for the right hand side.*

*4. Bunch up the spare GrowCover near the top of the stake,
twist it and secure to the stake or tie with string or plant
tie .*
